

EXECUTIVE BIOGRAPHY

Ihab Shraim

Ihab Shraim is the chief technology officer (CTO) at **CSC**, responsible for the vision, innovation, and product revenue growth within our company's cyber security, domain security, fraud protection, and brand protection lines of business.

Ihab has a proven track record in devising business strategies to consistently deliver strategic growth through focused technology innovation, go-to-market product strategies, and customer service excellence. His background includes strong expertise in facilitating the alignment of corporate business vision with information technology strategies to achieve measurable results with successful outcomes. Ihab has developed cutting-edge, patented disruptive technologies and services to deliver consistent year-over-year product revenue growth. Additionally, he is named as a primary inventor on 10 U.S. patents.

Prior to joining CSC, Ihab was on the Board of Binary Guard while also serving as their CTO. Prior to that role, he was the general manager for Presidio's managed security service, and the vice president of engineering (anti-fraud) and chief information security officer at Mark Monitor (Clarivate Analytics).

Ihab is a graduate of George Washington University and holds a BS in electrical engineering and computer science.
